Microsoft Azure – Easy Tables

Microsoft Azure – Account table Schema

Schema

+ Add a column

NAME	TYPE	IS INDEX
id	String	true
createdAt	Date	true
updatedAt	Date	false
version	Version	false
deleted	Boolean	false
name	String	false
schoolid	String	true

Microsoft Azure – ItemComment table Schema

Schema

+ Add a column

NAME	TYPE	IS INDEX
id	String	true
createdAt	Date	true
updatedAt	Date	false
version	Version	false
deleted	Boolean	false
itemid	String	true
userid	String	true
comment	String	false

Microsoft Azure – SaleItem table Schema

Schema

➕ Add a column

NAME	TYPE	IS INDEX
id	String	true
createdAt	Date	true
updatedAt	Date	false
version	Version	false
deleted	Boolean	false
description	String	false
price	Number	false
userid	String	true
name	String	true
hasPicture	Boolean	false

Microsoft Azure – SchoolDistance table Schema

Schema

+ Add a column

NAME	TYPE	IS INDEX
id	String	true
createdAt	Date	true
updatedAt	Date	false
version	Version	false
deleted	Boolean	false
fromid	String	true
toid	String	false
miles	Number	false

Microsoft Azure – Schools table Schema

Schema

+ Add a column

NAME	TYPE	IS INDEX
id	String	true
createdAt	Date	true
updatedAt	Date	false
version	Version	false
zip	String	false
school	String	true
address	String	false
deleted	Boolean	false
city	String	false
stateText	String	false
lat	Number	false
long	Number	false

Microsoft Azure – ZipCodes table Schema

Schema

➕ Add a column

NAME	TYPE	IS INDEX
id	String	true
createdAt	Date	true
updatedAt	Date	false
version	Version	false
zip	String	true
zipType	String	false
city	String	false
state	String	false
locationType	String	false
locationText	String	false
deleted	Boolean	false
lat	Number	false
long	Number	false
stateText	String	true
